Economics 480-1: Introduction to Econometrics (Fall 2020)

Economics 480-1 is the first third of the year-long introduction to econometrics for first-year Ph.D. students in economics. After 480, students may enroll in Economics 481 (econometric methods), Economics 482 (time-series analysis), and/or Economics 483 (applied microeconometrics). Prerequisites for 480-1 include undergraduate courses in probability and mathematical statistics with calculus emphasis. Grading is based on problem set assignments (10%), a midterm examination (40%), and a final examination (50%).

Text: C. Manski, Identification for Prediction and Decision (IPD), Harvard University Press, 2007. (Purchase Norris Bookstore or at Amazon [www.amazon.com](http://www.amazon.com).)

**Syllabus** (with tentative lecture and exam schedule)

**Introduction to Course** (9/17)

**Conditional Prediction** (9/22, 9/24)

IPD, Chapter 1

**Prediction with Incomplete Data** (9/29, 10/1, 10/6, 10/8)

IPD, Chapters 2 through 5

**Prediction of Treatment Response** (10/13, 10/15, 10/20)

IPD, Chapters 7 through 9

**Planning under Ambiguity** (10/27, 10/29, 11/3, 11/5, 11/10)

IPD, Chapters 11 and 12

**Predicting Choice Behavior** (11/12, 11/17, 11/19, 11/24)

IPD, Chapters 13 through 15

**Midterm Examination**: Thursday October 22, in class

**Final Examination**: Tuesday December 1, in class

**Recording by the Instructor**: This class or portions of this class will be recorded by the instructor for educational purposes. These recordings will be shared only with students enrolled in the course in Canvas and will be deleted at the end of the quarter. *Note that this applies to recording of synchronous class components and not to pre-recorded lectures by the instructor and not featuring student contributions.*

**Recording by Students**: Unauthorized student recording of classroom or other academic activities (including office hours) is prohibited. Unauthorized recording is unethical and may also be a violation of University policy and state law. Students requesting the use of assistive technology as an accommodation should contact [AccessibleNU](http://AccessibleNU).

**Copyright of Class Materials and Recordings**: Unauthorized use of classroom recordings – including distributing or posting them – is also prohibited. Under the University’s [Copyright Policy](http://CopyrightPolicy), faculty own the copyright to instructional materials – including those resources created specifically for the purposes of instruction, such as syllabi, lectures and lecture notes, and presentations. Students cannot copy, reproduce, display, or distribute these materials. Students who engage in unauthorized recording, unauthorized use of a recording, or unauthorized distribution of instructional materials will be referred to the appropriate University office for follow-up.
480-1 Lectures, Sections, Problem Sets, and Exams (tentative detailed schedule)

Lecture 9/17: IPD Introduction.

Section 9/18: NU computer facilities. Introduction to STATA, with application to linear regression.

Lecture 9/22: Conditional prediction, IPD 1.2 and 1A. 
Post Problem Set 1.

Lecture 9/24: Kernel Estimation of Best Predictors, IPD 1.3 and 1B.

Section 9/25: application of nonparametric regression.

Lecture 9/29: Missing Outcomes Using the Data Alone, IPD 2.1–2.4, 2.A; Statistical Inference 2.7, 2.C. 
Problem Set 1 due. Post Problem Set 2.

Lecture 10/1: Distributional Assumptions, IPD 2.5–2.6, Instrumental Variables, IPD 3.

Section 10/2: Discuss Problem Set 1. Jointly Missing Outcomes and Covariates, IPD Complement 2B

Problem Set 2 due.

Lecture 10/8: Decomposition of Mixtures, IPD 5.

Section 10/9: Discuss Problem Set 2.

Post Problem Set 3.

Lecture 10/15: IPD 7.5-7.7.

Section 10/16: applied analysis of treatment response.

Lecture 10/20: The Simultaneity Problem and Monotone Treatment Response, IPD 8 and 9 
Problem Set 3 due.

Section 10/21 (to be scheduled). Problem Set 3. Review for exam.

Midterm Exam 10/22: in class

Lecture 10/27: Planning under Ambiguity, IPD 11.1–11.3. 
Post Problem Set 4.

Lecture 10/29: Planning under Ambiguity, IPD 11.4–11.8 and 11A.

Section 10/30: Discuss Midterm Exam.

Problem set 4 due.
Lecture 11/5: Introduction to Statistical Decision Theory, IPD 12.1 and 12.2.

Section 11/6: Discuss Problem Set 4. Bayesian Statistical Decision Theory

Lecture 11/10: Treatment Choice with Data from a Randomized Experiment, IPD 12.3.

Lecture 11/12: Revealed Preference Analysis, IPD 13.1 and 13B.

Section 11/13: application of statistical decision theory to RCTs

Post Problem Set 5.

Section 11/20: Prediction Assuming Strict Preferences, IPD 13A.

Problem Set 5 due.

Section to be scheduled: Problem set 5. Review for exam.

Final Exam: 12/1 in class
